Comments from Head Coach Raegan Magnuson :

We had a good night of racing in Atlantic! With 23 teams competing, tonight was the first time we have gotten to race against many of these bigger schools after the weather affected our schedule the past couple of weeks. It was a great opportunity for our kids to challenge themselves, see where they stack up, and learn from some tough competition. The high school girls finished 8th as a team, with Taelen Young leading the way in 30th, followed by Jocelin Garcia, Monroe Bygness, and Isabelle Blume. Those four finished within 28 seconds of each other, giving us a solid group to build around as we look to move up in the team standings. Our JV girls also had a nice showing, with Ayyah Nemitz, Heydy Leanos, and Alexandria Perez all finishing in the top 20. Racing against this kind of competition gave the girls a good look at what we need to do to keep moving forward. The varsity boys had a strong showing, finishing 4th as a team Kevin Sanchez continues to lead the way for us, with Angel Garcia not far behind him. Having those two near the front and scoring low points is a big part of our team's success. Luke Ullrich also stepped up big today and ran a solid race for us, finishing 35th, while Quinn Vetter and Raul Castillo rounded out our top five. Our middle school girls finished 7th as a team, while the boys took 5th. Seth Ullrich had a great race, finishing 3rd overall, and Isaac Thelen earned a top-10 finish. Both groups continue to gain valuable experience, and getting to compete against larger schools is a great opportunity for them to learn and grow. One thing we can all continue to work on is getting out faster at the start, especially when we're competing in these bigger fields. We want to put ourselves in a competitive position right away and avoid getting boxed in. Overall, tonight was a good learning experience for our team. We learned a lot and have some good things to take away from this meet. We'll keep working on the things we can improve and make the adjustments that we need too.
